Samuel W. Bloom, *JAMA: The Journal of the American Medical Association*, Volume 1: A woman with what is quite probably a terminal illness must choose between courses of treatment based on contradictory diagnoses; a medical student causes acute pain in his patients as he learns to insert a central line; one doctor wonders how to react when a patient asks him to pray with her; another struggles to come to terms with his mistakes; a physician writes in a prominent medical journal about facilitating a dying woman's wish to end her life on her own terms; letters to the editor reflect passionate responses both in support of and in opposition to his actions. These experiences and many more are vividly rendered in *Patients, Doctors, and Illness*, which brings together nineteen pieces that appeared in the first edition of the *Social Medicine Reader* and eighteen pieces new to this edition. This volume examines the roles and training of health care professionals and their relationship with patients; ethics in health care and end-of-life experiences and decisions; it includes fiction and nonfiction narratives and poetry, definitions, and case-based discussions of moral precepts in health care such as truth-telling, informed consent, privacy, and autonomy, and readings that provide legal, ethical, and practical perspectives on many familiar but persistent ethical and social questions raised by illness and care.
